

Paul MARÉCHAL

Following my successful retraining and thanks to my two diploma courses at EISEE[it] and at the Sorbonne University | CFA of Sciences. I allow myself to propose my candidacy for the position of 3D front-end developer.

ABOUT ME

Thanks to my dual training, both in catering, in IT and a sum of successful professional experience, I have acquired a certain rigor, a sense of organization and an ability to adapt very easily. Teamwork and speed of execution are in essence essential values in catering, which I wish to put at the service of the job of web developer. I no longer wish to be a spectator but an actor in this world in perpetual change and renewal. Thanks to my double training in back and front-end, it allowed me to take into account my preferences for the front, UI/UX and especially concerning Three.js and webXR

EXPERIENCE

2021/2023

FRONT-END DEVELOPER

Aero-Bay

- UI/UX improvement of the site and back office.
- Realization of a Trello to organize tasks with the team in India and France
- Realization of models on Figma and new graphic elements with PhotoShop and Illustrator
- Realization in HTML5 / CSS3 / JS (vanilla / Three) - Thymeleaf / Django
- Monitoring and proposing new models and designs to improve the user experience and new 3D product presentation interface.

2023

THREE.JS TEACHER

IIM - Leonard de Vinci | Nanterre

I aim to pass on my knowledge to students in an interactive and fun way. I propose practical exercises and group work so that they can put into practice the skills acquired during this intervention.

- Theoretical course
- Practical exercises
- Group work

2021

FULL-STACK DEVELOPER INTERNSHIP

BBFT

- Creation of a web platform for the sale of fitness products
- Global vision of the objectives of accessibility, attractiveness, referencing, ergonomics and legitimacy as well as a 3D room visualization module
- Creation of the website in PHP / MySQL / JS / Three.js
- Code monitoring and validation to ensure the compatibility and security of the sales platform
